Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Wood Furniture Manufacturing Operations (40 CFR part 63, subpart JJ) apply to both existing and new wood furniture manufacturing operations that are major sources of hazardous air pollutants (HAPs). A "major source" is a stationary source or group of stationary sources that emit or have the potential to emit 10 tons per year (tpy) or more of a HAP or 25 tpy or more of a combination of HAPs. New facilities include those that commenced construction, modification, or reconstruction after the date of proposal. These standards also apply to existing and new incidental sources and to area sources. These sources are only required to maintain purchase or usage records demonstrating that they meet the definition for incidental or area sources. Incidental and area sources are not subject to any other provisions of these standards. An

“incidental source,” as defined in these standards, is a major source that is primarily engaged in the manufacture of products other than wood furniture or wood furniture components, and that uses no more than 100 gallons per month of finishing material or adhesives in the manufacture of wood furniture or wood furniture components. An “area source” is any stationary source that is not a major source.”

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart JJ.

Form Numbers: None.

Respondents/affected entities: Wood furniture manufacturing facilities.

Respondent’s obligation to respond: Mandatory (40 CFR part 63, subpart JJ).

Estimated number of respondents: 856 (total).

Frequency of response: Initially, occasionally, quarterly, semiannually, and annually.

Total estimated burden: 70,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$7,780,000 (per year), which includes \$24,600 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: The increase in burden hours and the number of responses from the most-recently approved ICR is due to several adjustments: 1) This ICR accounts for the time for each source to refamiliarize themselves with the regulatory requirements each year; and 2) this ICR added in one-time requirements for reconstructed and modified sources that were missing from the previous renewal and edited the frequency of records to better match regulatory

requirements. Overall, these changes resulted in an increase of 4,565 hours.

Director, Regulatory Support Division.
